Title: AI Chatbot Provider in Vellore | Intelligent Automation Solutions

URL: https://redbackai.in/ai-chatbot-provider-in-vellore/

AI Chatbot

Our AI Chatbot is a smart, always-available digital assistant designed to transform how businesses interact with their customers. It responds instantly to user questions, providing accurate and relevant answers 24/7 without any delays. Powered by advanced artificial intelligence, it understands natural language and delivers human-like conversations. Whether your visitors need product details, support, or general guidance, the chatbot is always ready to help.

It reduces customer waiting time and improves overall satisfaction. By handling repetitive queries automatically, it allows your support team to focus on more complex tasks. The chatbot can be customized to match your brand's tone and business needs. It works seamlessly across websites, dashboards, and applications.

FAQ about AI Chatbot

Question: How do I train the AI chatbot with my own data?

Category: Training the AI Chatbot

Answer: Login to your chatbot dashboard using the company-provided credentials. Then click on AI Knowledge, then Knowledge Base, and choose the source type which can be plain text or JSON. Input your data and add it to the knowledge base. Next, go to Qdrant.tech, register for an account, and create a cluster. You will receive a cluster API key and an endpoint. Use these credentials in Account then Knowledge Configuration, save the settings, and that is it. You have successfully created your bot's knowledge base with your data.

Question: How does the AI Chatbot Website Crawler work?

Category: Training the AI Chatbot

Answer: You simply provide your website URL to the Website Crawler. The crawler automatically fetches data from your website. It extracts the important content and site URLs and presents them in plain text format. You can then copy and paste this data directly into your knowledge base. This process reduces your workload, since you do not have to manually create or input content yourself.

Question: What happens when the AI is unsure or the question is too complex?

Category: Training the AI Chatbot

Answer: You can enable WhatsApp fallback. When AI confidence drops below your set limit, the chatbot shows a Connect with a human on WhatsApp button that starts a chat with your business number.

Question: Can visitors see their previous conversations with the AI chatbot?

Category: Chat History and Visitor Experience

Answer: Yes. Chat history is stored per browser or user account. Visitors can reopen the widget anytime and continue their previous conversation.

Question: How do I turn notification sounds on or off for AI replies?

Category: Customizing the AI Chatbot Interface

Answer: Go to Bot Styling then Customize Settings and toggle Enable Notification Sound Reply. Currently, you can only enable or disable this option. In the future, you will be able to use your own custom message tone for notifications.

Question: How do I change colors, fonts, and font sizes for the AI chatbot?

Category: Customizing the AI Chatbot Interface

Answer: Go to Bot Styling then Customize Settings. From there, you can select your brand colors including chatbot color and background color, choose a Google Font from the given list, and adjust the font sizes.

Question: Can I change the bot name, welcome message, and position on screen?

Category: Customizing the AI Chatbot Interface

Answer: Yes. In the Appearance tab, you can change the bot name, write a custom welcome message which supports emojis and line breaks, and select whether the chatbot appears on the bottom-left or bottom-right.

Question: How do I clear or reset a conversation?

Category: Chat History and Visitor Experience

Answer: In the bot header, there is a Reset button. Clicking this button will clear your chat history and start a new chat.

Title: Live Chatbot Provider in Vellore | Real-Time Support Solutions

URL: https://redbackai.in/live-chatbot-provider-in-vellore/

Live Chatbot

Our Live Chatbot connects your website visitors directly with real human agents in real time. It allows customers to get instant, personalized support whenever they need help. Agents can handle multiple conversations at once through a powerful live-chat dashboard. This ensures faster responses and better customer satisfaction.

The live chatbot builds trust by letting users speak to a real person instead of waiting for emails or calls. It is perfect for sales inquiries, technical support, and customer service. Visitors can easily switch from AI to live chat when they need human assistance. The system shows agent availability so users always know when help is online. With Live Chat, your business stays connected and responsive at all times.

FAQ about Live Chatbot

Question: Is the live chatbot styling customizable?

Category: Customizing the Live Chatbot Interface

Answer: Yes, the live chatbot styling is customizable. You can adjust colors, fonts, position, bot name, and the welcome message, just like with the AI chatbot.

Question: How does the live chat system know whether an agent is online, offline, or disconnected?

Category: Agent Availability Status

Answer: The live chat system continuously monitors the agent's dashboard connection in real time. When an agent logs in, their status automatically changes to Online and is shown with a live indicator. If the agent logs out, the status switches to Offline. If the internet or system connection is lost during a conversation, the status changes to Disconnected, ensuring visitors always see the correct agent availability.

Question: Can an agent handle multiple website visitors at the same time?

Category: Multi-Visitor Chat Management

Answer: Yes, the live chat system allows agents to manage multiple visitor conversations simultaneously. With the Livechat or full package, agents get a dedicated live-chat dashboard separate from account and billing settings. This chat area displays a real-time list of all active website visitors. Agents can easily switch between conversations and respond to multiple users efficiently without missing any messages.

Question: Can I send files in the Live Chat Bot, or is it only text?

Category: Chat Message Types

Answer: Currently, the Live Chat Bot supports text messages and emojis only. File attachments are not available in the current version. However, file sharing is planned for a future update. This ensures a smooth and fast chat experience while we continue to add more advanced features.

Question: Which industries commonly use live chatbots?

Category: Industries Using Live Chatbots

Answer: Live chatbots are highly useful in customer service, marketing, sales, and e-commerce. They provide 24/7 instant support, recover abandoned carts, qualify leads, recommend products, and improve user engagement, helping businesses save time and increase conversions.

Question: Does a live chatbot reply like a human agent or an AI reply?

Category: Human Agent Live Chat Explained

Answer: The live chat, often called live agent chat, is designed for human-to-human conversation. The website visitor types anything in the browser, and a real live agent replies from a dashboard in real time.

Question: Can I set the Live Chat Bot as my default bot?

Category: Default Bot Settings

Answer: Yes, when you purchase the full package, you get three bots: AI Chatbot, Live Chat Bot, and FAQ Bot. In the dashboard bot settings, you can choose which bot appears on your website by default. You can set the Live Chat Bot as the primary bot or switch to any other bot anytime. This gives you full control over how visitors interact with your support system.

Question: How can I switch another bot to Live Chat mode if I purchase the full package?

Category: Bot Switching System

Answer: When you purchase the full package, you get three bots: AI Chatbot, Live Chat Bot, and FAQ Bot. A bot switch button is available in the chat header. By clicking this button, you can instantly switch from any bot to the Live Chat Bot. This allows visitors to talk directly with a real human agent whenever they need personalized support.

Title: FAQ Chatbot Provider in Vellore | Automated Query Solutions

URL: https://redbackai.in/faq-chatbot-provider-in-vellore/

FAQ Chatbot

Our FAQ Chatbot is designed to provide instant answers to your customers' most common questions. It uses a smart, organized knowledge base to deliver accurate and consistent responses. Visitors can quickly find the information they need without waiting for a support agent. The FAQ bot works 24/7, making sure help is always available.

It reduces support workload by handling repetitive inquiries automatically. You can easily add, edit, and organize questions from the dashboard. The chatbot presents information in a clear and easy-to-understand way. It improves customer experience by offering fast and reliable support. With the FAQ Chatbot, your business becomes more efficient and customer-friendly.

FAQ about FAQ Chatbot

Question: What is the FAQ chatbot?

Category: Main Purpose

Answer: The FAQ Chatbot is designed to provide instant answers to common customer questions using pre-stored questions and responses. It helps visitors get quick information without waiting for a human agent. This bot improves customer experience by offering accurate and consistent replies 24/7. It also reduces the workload on support teams by handling repetitive queries automatically.

Question: Can I add my own questions and answers to the FAQ chatbot?

Category: Custom FAQ Management

Answer: Yes, you can easily create and manage your own FAQs from the dashboard. There is no limit to how many questions and answers you can add. You can organize them based on your business categories

or customer needs. This allows the FAQ chatbot to deliver accurate and customized support to your visitors.

Question: Can FAQs have multiple levels?

Category: Hierarchical FAQ Structure

Answer: Yes, the FAQ bot supports a parent and child structure. You can create a main topic and add multiple related sub-questions under it. This allows users to explore information in a step-by-step and organized way. It makes finding the right answers faster and more user-friendly.

Question: Can I edit FAQ answers?

Category: FAQ Content Editing

Answer: Yes, you can edit and update FAQ answers using the CKEditor rich-text editor. It allows you to format content with headings H2 and H3, add links, and create lists. You can also style and improve the layout of your answers for better readability. This helps you keep your FAQ content clear, professional, and up to date.

Question: Does the FAQ chatbot support the same visual customization as the others?

Category: Visual Customization

Answer: Yes. You can customize colors, fonts, position, bot name, welcome message, and sounds just like the AI and live chat bots.

Question: Can I remove the company link shown in the bot footer?

Category: Bot Footer Customization

Answer: Yes, the company link in the bot footer can be removed upon request. This option is not available directly in the dashboard, so you will need to contact our support team. You can also replace it with your own company name and website link if you prefer. Our bot creators will help customize the footer based on your branding needs.
